

# Introduction

## Syllabus:

Number Reinforcement: Identification of numbers from 1 to 50. Also identify 2-digit numbers (10-50) using 'Tens' and 'Ones' rods on Abacus tool.

Addition & Subtraction: Diagram based one digit 2, 3 numbers bead type Questions (Identification of number from diagram, Addition & Subtraction)

Finger Theory Mastery: Specific drills to ensure consistent use of the thumb and index finger for bead movement in solving Addition & Subtraction.

Finger abacus:

Right Hand (Units 0–9)

Fist: Represents zero.

Index, Middle, Ring, and Pinky: Each represents 1.

Thumb: Represents 5.

Left Hand (Units 10–90)

Left Index, Middle, Ring, Pinky: Each represents 10

Left Thumb: Represents 50

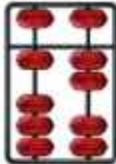

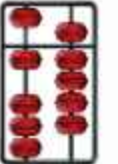

## Practice Question Paper 1

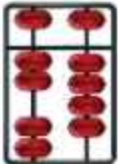

## Practice Question Paper 2

## Answer Key

# Bead counting

| QUESTIONS | Q1.                                                                               | Q2.                                                                               | Q3.                                                                               | Q4.                                                                                | Q5.                                                                                 | Q6.                                                                                 | Q7.                                                                                 | Q8.                                                                                 | Q9.                                                                                 | Q10.                                                                                |
